

P&M胶囊抛光机&金检机

P&M Capsule Polisher & Metal Detector Combo

► 介绍 (Introduction)

胶囊抛光金检机是一款集胶囊抛光、除尘、提升、分选和金属检测于一体的多功能设备，适用于所有类型的胶囊。该设备结合了先进的抛光技术和高频金属检测技术，提供更优质的检测效果。设备设计兼容性强，可配套任何型号的胶囊填充机，确保产品质量。通过多项技术升级，胶囊抛光金检机为制药行业提供了一种高效、安全的解决方案，是胶囊生产线上不可或缺的设备。

The capsule polishing metal detector is a multi-functional device that integrates capsule polishing, dust removal, lifting, sorting and metal detection, suitable for all types of capsules. The equipment combines advanced polishing technology and high-frequency metal detection technology to provide better detection results. The equipment design has strong compatibility and can be matched with any model of capsule filling machine to ensure product quality. Through multiple technical upgrades, the capsule polishing metal detector provides an efficient and safe solution for the pharmaceutical industry and is an indispensable equipment on the capsule production line.

► 技术参数 (Technical Parameters)

参数ITEM	型号TYPE	P&M-129
适用胶囊型号 Applicable Capsule Sizes	-	00# 0# 1# 2# 3# 4#
进料口/出料口高度 Inlet/outlet Height	mm	760 / 634
外形尺寸 Overall Size	mm	1230*428*1423
最大生产量 Max.Capacity	pcs/h	300000
机器净重 Net Weight	kg	125
压缩空气接口处 Compressed Air Interface	-	0.3 m3/min-0.3MPa
真空吸尘 Vacuum Cleaner	-	3.0 m3/min-0.02MPa
工作电压 Working Voltage	-	220V 50/60Hz
